Work History

MERN stack developer trainee | Zorg IT

12/2021 – March

I worked at this company as a MERN Stack Developer trainee. Here other members of our team and I have collaboratively completed multiple projects. One of them is the "Arcon Interior" project. The project aimed to deliver the best quality and secure website support to the Arcon Interior Firm.

- I have built React UI components such as Admin panel dashboard, hero section, about us page and footer section, fixed UI issues and also, I have integrated APIs.
- During this internship, I learned Mongoose, MongoDB more extensively, and other necessary technologies related to the MERN stack.

Fronend developer | Techneous

06/2021 – 12/2021

I was responsible for developing the frontend part of a project at the company. And as long as I was an employee of the company I did my job nicely. Below are links to some of the website templates I have developed.
